

Award & Bid Results

“Who was awarded the contract?” If this question sounds familiar, the transparent option to publish award and bid results will allow all suppliers to view the awarded bid. However, publication of awarded information and bid results is not always a mandate; SourceSuite’s Award and Bid Results module provides the option to simply enter award and bid information for record keeping, facilitating the management of all awarded bids, solicitation results and associated information. A complete history of your organization’s procurement initiatives including solicitation bidding results, vendor information, and related documentation is visible online at anytime. The information can be effortlessly integrated with the Buyer Dashboard, allowing bid and awarded data to be exported for reporting and analysis. The Award and Bid Results feature in SourceSuite makes it easy to reference your organization’s complete procurement history.

FEATURES
